HPC Visualizations

Dear attendee,

Welcome and thank you for registering for this session.

In this note, you will find some useful information which will take place on Tuesday, December 7th between 9:00 and 12:15.

This presentation can be actively followed or passively viewed at any time, as you prefer.

The slides can be found at:

http://phony1.technion.ac.il/~phr76ja/prace/title.html

For active participation registered workshop participants need to activate vpn as per the letter you received and have your account/password for access1 or access2. You need a way to ssh to access1/2; mobyxterm recommended.

There are instructions for independent execution for Technion researchers anytime (using your account on aluf which uses your Technion email password so everyone at the Technion has it) or for researchers with access to Weizmann vpn as long as AViz remains there. Technion off-campus researchers will need pulse secure. A link to install AViz on your computer is also given.

Where to get help:

1. Weizmann vpn -
Igor Chebotar - igor.chebotar@weizmann.ac.il

2. Install mobyxterm - see https://mobaxterm.mobatek.net/ or ask your local software support
3. Technion aluf and pulse secure - Technion CIS consultants
4. Install and use AViz - http://phony1.technion.ac.il/~aviz and if more help is needed you can reach me at phr76ja@ef.technion.ac.il

I am looking forward to seeing you on Tuesday!

Joan Adler
phr76ja@ef.technion.ac.il
